### DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

#### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “radar sensor to be exposed to face a rear area behind the vehicle” in claim 1, and “a magnet” in claim 6 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Reasons for Allowance***

2. Claims 1-8 would be allowable if the drawings are amended to overcome the objections, set forth in this Office action.

3. The following is a statement of reasons for the indication of allowable subject matter:

The cited art of record does not teach or suggest a retaining device for a vehicle radar sensor comprising a housing having a rear surface which two opposite platforms protrude to define a path between the two platforms and a fastener having first and second engagement members wherein the second member is adapted to clamp an edge of a rear cover of a vehicle to allow the radar sensor to be exposed to face a rear area behind the vehicle.

***Conclusion***

4. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter
